Girls Who Code Special Projects

What are you interested in?

Anything computer science, statistics, math, finance, biology related?

Idea:

Choose a topic you interested in and come up with a lesson and/or mini-project for you all to complete. Teach each other something new!

Today:

Extension of conditionals lesson.

- Dice Rolling Game

Next Sunday:

Monty Hall Problem.

Today's Project: Dice Roll Simulator

> Task: Write code that rolls two dice thousands of times and use conditionals to track what happens

> The idea: Run the same code once vs. 10,000 times. Watch how the percentages become predictable the more you simulate.
