HTML
CSS

Web Development

Lesson 1

Emory Girls Who Code - Spring 2026

THE PLAN FOR TODAY

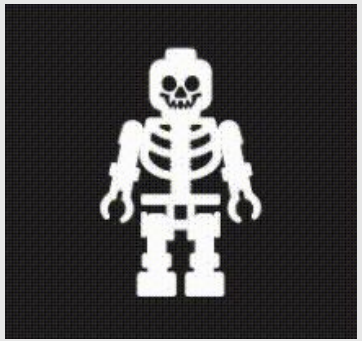

1) What is HTML
2) What is CSS
3) Try out HTML/CSS

What is HTML?

HTML = HyperText Markup Language

It gives a webpage **structure**.

HTML Structure

CSS Design

JavaScript Interactivity (next class!)

What is HTML?

HTML is like:

- The skeleton of a body
- The frame of a house

HTML tells the browser:

- This is a title
- This is a paragraph
- This is an image

Page Structure

```
<!DOCTYPE html>
<html>
 <head>
  <title>My Website</title>
 </head>

 <body>
  <h1>Hello!</h1>
  <p>This is my first webpage.</p>
 </body>
</html>
```

Important:

- Everything goes inside <html>
- Visible content goes in <body>

Tags

```
<p>Hello</p>
```

- → opening tag
- → closing tag
- Most tags come in pairs

Headings

```
<h1>Big Title</h1>
<h2>Smaller Title</h2>
<h3>Even Smaller</h3>
```

- h1 → biggest
- h6 → smallest

Paragraphs & Line Breaks

```
<p>This is a paragraph.</p>

<br>
```

Links

```
<a href=”https://google.com”>Click me</a>
```

href = where the link goes

The text between tags is what users click

Images

```
<img src=”cat.jpg” alt=”A cat”>
```

src → image source

alt → description (important for accessibility!)

Note: <img> does NOT need a closing tag.

Lists

```
<ul>
  <li>Pizza</li>
  <li>Sushi</li>
</ul>

<ol>
  <li>Step 1</li>
  <li>Step 2</li>
</ol>
```

Unordered list

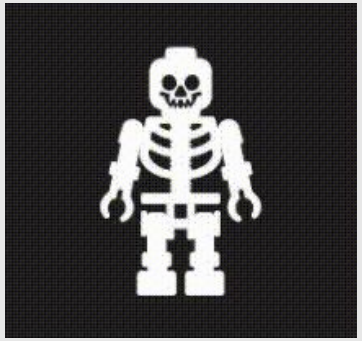

Ordered list

What is CSS?

CSS = **Cascading Style Sheets**

It makes websites look good.

HLML Structure

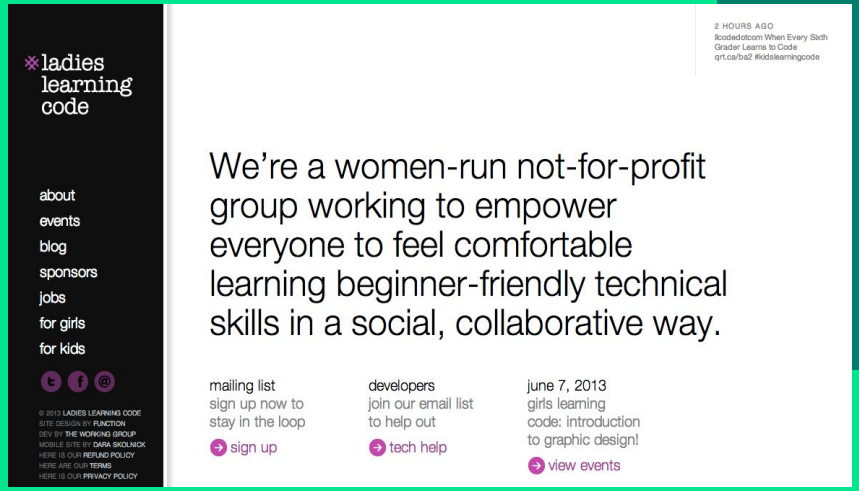

CSS Design

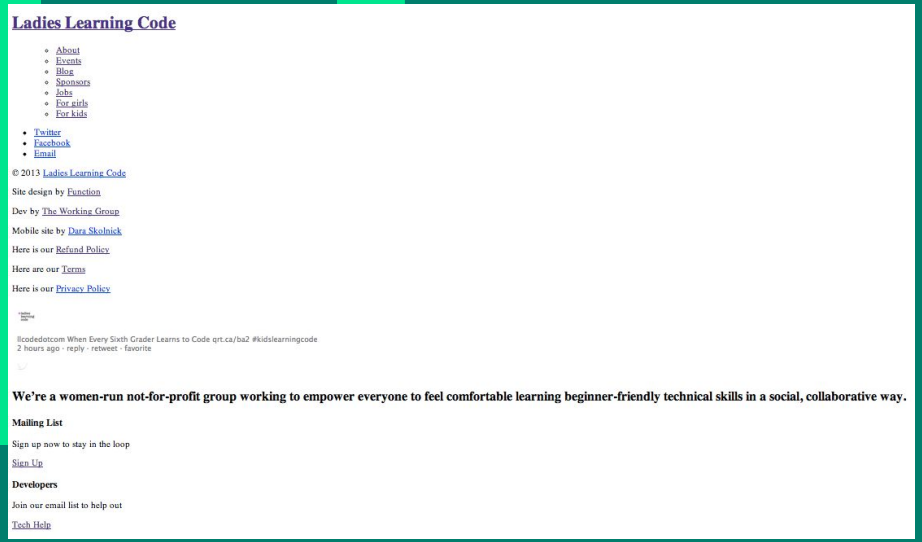

JavaScript Interactivity (next class!)

With CSS

Without CSS

What is CSS?

CSS controls:

- Colors
- Fonts
- Size
- Spacing
- Layout

CSS Syntax

- CSS is made up of **rules** that refer to HTML elements
- Looks like this:

  h1 {}

- This means select all h1 elements and apply styles to them within the curly braces

CSS Syntax

```
Background-color: #7CF248;
Height: 370px;
Width: 600px;
Font-size: 20px;
Font-family: sans-serif;
```

Everything that goes into the curly braces is in a **property** and **value** format

Where to put your CSS code?

```
<!doctype html>
  <head>
   <title>Girls Who Code Students Learning HTML and CSS</title>
   <style>
    p {
    color: red;
    text-decoration: underline;
    }
   </style>
  </head>
  <body>
   <p>This is a paragraph</p>
  </body>
```

Notice that we put the CSS styles in the <head> tag, not the <body>

Make a page for your website!

Thank you!

Next Time: Javascript (Basics)

- Emory Girls Who Code

```
body {
    background-color: powderblue;
}
img {
    display: block;
    margin: 0 auto;
    width: 300px;
}
h1 {
    color: darkmagenta;
    text-shadow: 2px 2px 5px grey;
}
p {
    font-family: ”Courier New”;
    font-size: 1.2rem;
}
```
